

What Riskalyze Does For You

Riskalyze is **cutting edge technology** that pinpoints your acceptable level of risk with unparalleled accuracy. With Riskalyze, we can ensure that the risk in your portfolio aligns with your investment goals and expectations.

Riskalyze is built on Prospect Theory, the academic framework that won the **Nobel Prize for Economics**.

How Does Riskalyze Work?

Capture Your Risk Number

The first step is to take a 5 minute quiz that covers topics such as portfolio size, top financial goals, and what you're willing to risk for potential gains. Then we'll pinpoint your exact Risk Number to guide our decision making process.

Align Your Portfolio

After pinpointing your Risk Number, we'll craft a portfolio that aligns with your personal preferences and priorities, allowing you to feel comfortable with your expected outcomes.

The resulting proposed portfolio will include projections for the potential gains and losses we should expect over time.

Meet Your Retirement Goals

Before we're finished, we'll also review your progress toward your financial goals by building a Retirement Map. When you're done, you'll fully understand the probabilities of success, and what we need to do to increase it.
